

*This is a set of the instructions to help download and extract NCDB PUF files using Windows XP/ Windows 7 32/64 bit. Since the files are encrypted using an AES-256 bit encryption process, another application (7zip) will have to be installed in order to extract the information.*

Download your PUF file from <https://m.facs.org/puf> by choosing the “Download” button. Choose “Save As...” instead of Open, as the default zip application handler may not be able to open an encrypted zip file.

New Applications are no longer being accepted as of 4/3/2013. Next application cycle will begin January 2014

Choose Run and Follow the installer instructions

## Choose Next/Next/Finish to complete the install

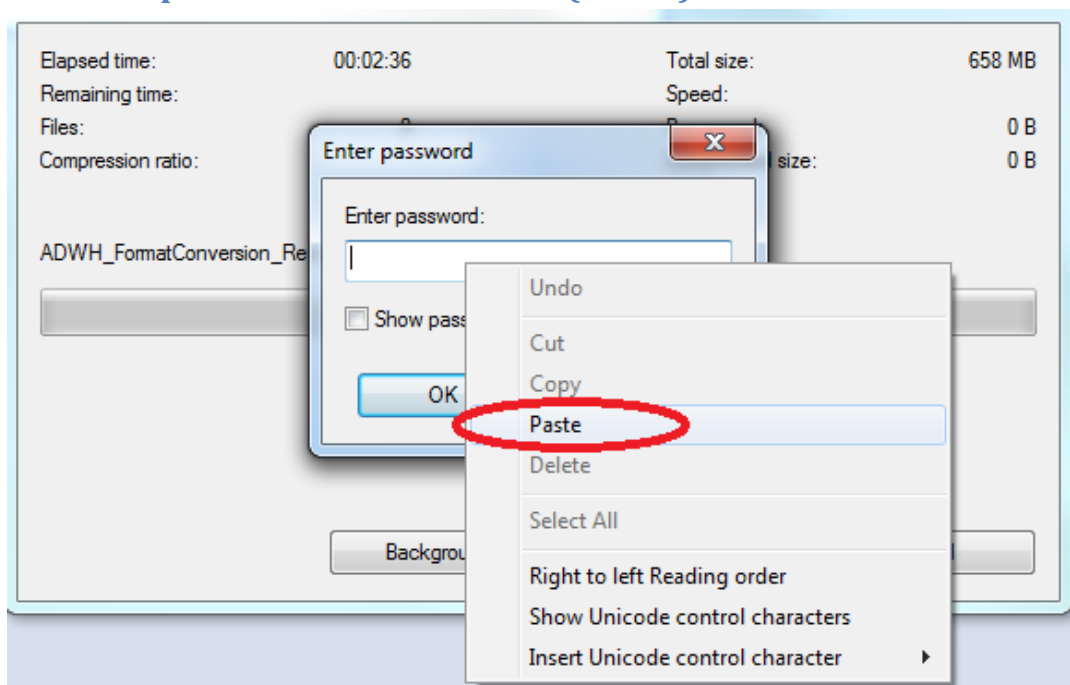

After installing, browse to the downloaded NCDB PUF zip file. Right click on the zip File; find the “7-Zip” context menu; the Sub-Menu will appear; Choose Extract

It will prompt you for a password. Get the password for the “copy” icon, which will copy the password to the clipboard from <https://m.facs.org/puf>
